page!

### SUMMARY OF DUTIES

Behavioral and Educational Solutions, PC (BES) invites applicants for a full-time internship in School Psychology from graduate students who are enrolled in a NASP-accredited school psychology program. The ideal intern will appreciate school psychology from an ecological perspective in which the child or student is connected to a dynamic integration of multiple systems. BES is a behavioral health consulting company dedicated to delivering multidisciplinary, culturally-competent, systems focused, and developmentally appropriate services. At BES, we believe individuals do not live within vacuums; hence, our mission is to provide data-driven services that establish strong, collaborative, engaged relationships between the families, schools, and other systems.

Internship experiences include: school-based psychological assessment, behavioral intervention, functional behavioral assessment, education planning and support, classroom management coaching, parent and teacher training and consultation, professional development, applied behavior analysis (ABA), and systems-level intervention teams.

Our office is located in Silver Spring, MD, a suburb of Washington, D.C. The Washington D.C. metro area provides access to an array of cultural, dining, and historical events and experiences. Access to a large, diverse, urban area affords interns opportunities to develop competencies working in and between urban public charter schools and government agencies.

Our internship program is predicated on a scientist-practitioner model. Interns will have the opportunity to build their skills in school-based assessment and applied behavior analysis. Services are provided in the natural setting which may include experiences in the school, home, and/or community. The school psychology intern will work under the direct supervision of a licensed psychologist and nationally certified school psychologist.

Upon successful completion of training and fulfillment of requirements for Maryland and Washington D.C. certification, the intern will receive preferential consideration for full-time employment.
